

VIRGINIA ENGINEERS POLITICAL ACTION COMMITTEE

## 2011 GOLF CLASSIC

# Why Get in the Game?

Participate in the 2011 Golf Classic - An easy and fun way to support VEPAC

MAKE YOUR VOICE HEARD! Legislation introduced each year affects issues important to engineering firms and Professional Engineers. Issues such as Limitation of Liability, QBS, transportation, immigration, and dam safety are just a few that we continually fight on behalf of the engineering profession. *We need the Virginia legislators to understand the concerns of the engineering community when reviewing these issues.*

## Why Contribute?

Limitation of Liability - Language clarifying contractual agreements for Limitation of Liability clauses passed in 2010, preventing the erosion of Virginia's Limitation of Liability laws. VEPAC contributions boosted our efforts by opening doors for the profession.

Dam Safety – Over the past 2 years bills were introduced that would reduce the maintenance of dams, which could result in loss of life or property. Our efforts helped preserve standards to protect the welfare and safety of Virginia citizens but additional efforts to erode the law are anticipated again next year.

## Why Participate?

Politics - Controlled by Those Who Show Up – Engineers bring expertise and depth to many of today's critical transportation and infrastructure issues. NO ONE fights for the bills important to engineers except us!

Support of Key Candidates – ALL legislators are up for re-election in 2011 so contributions are very important to elect legislators willing to listen to our concerns. VEPAC funds support the re-election campaign for legislators who support the engineering profession.

Education of Legislators – Many legislators need to be educated on issues, such as dam safety so they understand the consequences of changes to the law.

Registration forms available soon at [www.acecva.org](http://www.acecva.org) or [www.vspe.org/VEPAC](http://www.vspe.org/VEPAC) (click on events).
