

Why Get in the Game?

Issues such as QBS, transportation, immigration, and the regulations that impact your right to practice in the Commonwealth are directly affected by legislative action taken by the General Assembly. It is imperative that Virginia legislators hear the voice of the engineering community when they are reviewing these issues. VEPAC is that voice!

Why is it important for me to participate?

- Politics - Controlled by Those Who Show Up – The expertise of engineers brings depth and an important perspective to many of today's critical transportation and infrastructure issues
- Support of Key Candidates – These funds help support the re-election campaign for legislators who support the engineering profession
- Educate New Legislators – Many engineering issues are complex and require extensive education for new legislators to understand

We need your financial help to accomplish these goals. Participate in the 2008 Golf Classic - the easiest and most enjoyable way to support VEPAC and make your voice heard in the Virginia General Assembly!

How are tournament proceeds used?

After all direct tournament expenses are paid, the balance is used to help elect and re-elect worthy candidates running for office in the Virginia Legislature.

Get in the Game...

Play for VEPAC on June 11!

Registration forms are available at:
